COURAGEOUS
PARENTS
NETWORK

**A Novel, Interactive, Online and Free CME Module
in Pediatric Palliative Care and Advanced Care Planning**

Registration Free

Produced by Massachusetts General Hospital for Children in partnership with
Courageous Parents Network

Intended for pediatric practitioners.

This interactive activity explores the role of pediatric palliative care and advance care planning when working with children with serious illness. Specific tools are provided to empower the clinician to initiate difficult discussions with patients and their families, aid the family in advance care planning, and support the family after the death of their child.

The one hour course consists of four sections:

- What is Pediatric Palliative Care
- Advanced Care Planning
- Initiating Difficult Conversations
- Transitioning to End-of-Life/Bereavement

Central to each section are parent voices and perspectives, presented via Courageous Parents Network videos featuring three different family stories.

To register at no cost, visit: www.phscpd.org/PediatricEndofLife

LEARNING OBJECTIVES

- Describe the role of pediatric palliative care in serious illness in children
- Select patients who would benefit from palliative care and describe the available resources
- Demonstrate an increased ability to initiate and discuss advanced care planning with patients and their families

ACCREDITATION

Partners HealthCare System is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Partners HealthCare System designates this enduring material activity for a maximum of 1 AMA PRA Category 1 Credit. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

An Interactive, Online and *Free* CME Module in Pediatric Pain Management

Registration Free

Produced by Massachusetts General Hospital for Children

Intended for pediatric practitioners.

This interactive activity will enable clinicians to accurately assess pain in patients in various stages of development, identify warning signs, and select appropriate management strategies when treating headache and chronic abdominal pain.

To register at no cost, visit:

www.phscpd.org/PediatricPainManagement

LEARNING OBJECTIVES

- Accurately assess pain in pediatric patients in various stages of development
- Prescribe appropriate medications to treat pain in pediatric patients and identify the risks associated with the use of narcotics
- Recognize red flags or warning signs in pediatric patients presenting with pain.
